

DualGuard

-86°C Ultra Low Temperature Freezer

Reliable Storage for Your Most Critical Samples

Engineered for the secure storage of temperature-sensitive materials, the DualGuard ULT Freezer ensures maximum protection for:

Vaccines

Longitudinal study samples

Clinical trial specimens

Medical research samples

Valuable pharmaceutical products

Designed for precision and dependability, the DualGuard ULT Freezer safeguards what matters most in research, healthcare, and pharmaceutical applications.

DualGuard

-86°C Ultra Low Temperature Freezer

Safer by Design

DualGuard ULT freezers are engineered to deliver the highest level of protection for high-value, temperature-sensitive samples.

By utilizing two independent refrigeration systems, the DualGuard ensures fail-safe performance. In the rare event that one system fails, the other continues to maintain a consistent -80°C environment—safeguarding your critical biological and pharmaceutical materials without interruption.

Globally Trusted Components

Equipped with compressors and fans from internationally renowned brands, ensuring exceptional reliability and up to 20% longer lifespan.

Comprehensive Alarm System

Multifunctional Alarm : High / Low temperature, Sensor error, Power failure, High ambient temp., Door ajar, Door open alarm, low battery alarm.

Superior Temperature Uniformity

Maintains consistent internal temperatures to minimize sample degradation due to fluctuations, safeguarding sample integrity.

Rapid Temperature Pull-Down

Achieves -81°C in approximately 3 hours (at 25°C ambient), minimizing downtime and protecting samples more quickly.

Patented LBA Forming Technology

Innovative cabinet insulation using patented LBA forming agent results in higher density construction, improving space utilization by 10% and enhancing thermal efficiency.

DualGuard

-86°C Ultra Low Temperature Freezer

861-720

- 1 Multi-layer Silicone Sealing Structure**
Multi-layers silicone gaskets provide a tight seal between the inner doors and outer door, reducing heat exchange rate and retaining the inner temperature better when there is power failure.

- 2 Multi-level Alarms**
Alarm functions include high, low temperature, sensor error, power failure, high ambient alarm, door open alarm.

- 3 Ingenious Handle Design**
Ingenious handle design helps you easy to open and close door easier. Lockable handle safeguards your precious samples. Padlock can also be added for extra sample safety.

- 4 Stainless Steel Cabinet**
5 inner compartments (4 shelves, 5 inner doors)
Abrasive and corrosion resistance, easy clean.

- 5 VIP PLUS**
VIP PLUS vacuum insulation provides up to 30% more storage capacity than a conventionally insulated freezer.

- 6 Heated Pressure Equalization Port**
It allows users to re-open the main door quickly when entering ,rust-proof, freeze-free.

- 7 Filter Design**
Tool-free removable filter design, easy and quick to clean the filter.

DualGuard Cooling System offers the high level security storage. Two independent systems, in the case of an unexpected failure of one cooling circuit, the other can maintain the freezer's temperature uniformly in the -80°C range.

DualGuard Cooling system

The advanced VIP Plus vacuum insulation technology offers up to 30% more storage capacity compared to conventional insulation without expanding the freezer's external dimensions. Featuring a high-performance glass fiber core, VIP Plus delivers superior thermal efficiency, ensuring optimal protection of your valuable samples while maximizing internal space.

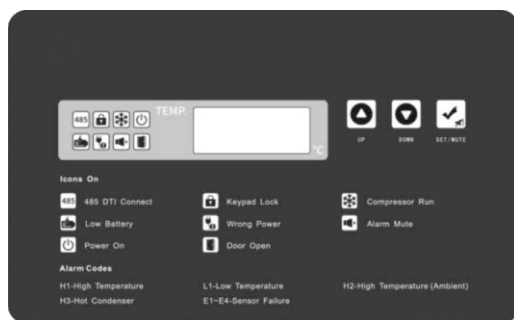

VIP PLUS Design

Patented D-Shaped Evaporator

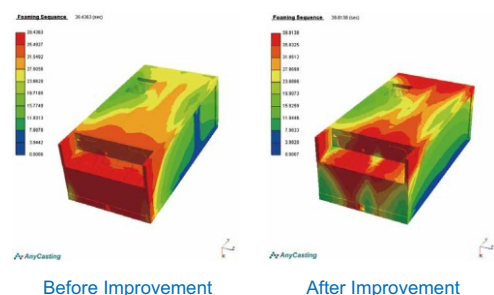

Enhanced Heat Exchange for Faster Performance
Our patented D-shaped evaporating tube design increases the heat exchange surface area by up to 15%, significantly improving cooling efficiency.

With greater contact between the tubing and internal surfaces, this innovation enables a faster temperature pull-down ensuring quicker stabilization and enhanced sample protection.

User-Friendly Interface with Advanced Monitoring
The DualGuard ULT Freezer is equipped with an integrated microprocessor controller and a clear LED display (optional LCD touchscreen available) to ensure precise control and an optimal user experience. A built-in USB port enables easy data logging and transfer, allowing users to conveniently monitor and manage temperature performance via PC.

Intelligent Control System

- 1) Enhanced Insulation for Greater Energy Savings
- 2) Optimized Foaming Layer Design
A more intelligent foaming structure increases internal storage volume, resulting in higher space utilization without compromising performance.

LBA Forming Technology

Active ECO Technology

Smart Efficiency Built into Every Unit Active ECO Technology is standard across all Venchal Scientific ULT freezers, enabling them to operate in ECO mode by default.

This advanced system continuously adapts to internal load and temperature changes, automatically adjusting compressor speed for optimal performance.

The result:

- Significantly reduced energy consumption
- Consistent interior temperature uniformity
- Quiet, efficient, and reliable operation

Experience the perfect balance of energy efficiency and temperature stability with Active ECO Technology.
